

Indiana Professional
Lawn & Landscape
Association

Indiana Irrigation
Contractors Council

To our Customers and Community,

During this period of great uncertainty, we are proud to continue serving residences and businesses with ongoing lawn care, irrigation, or other landscape services. Like electricians, plumbers, exterminators, and other repair personnel, we are tradespeople and pride ourselves in helping maintain the safety, sanitation, and essential operation of the properties we care for on a scheduled and ongoing basis.

Lawn, irrigation, and landscape services clearly maintain the quality of the property and of life around it. A well maintained landscape reduces erosion, provides cooler and softer playing surfaces for our youth, and reduces the presence of pests such as fleas, ticks, and even mosquitos. Properly maintained green spaces play a role in reducing the chance of injury.

Your lawn care, irrigation, and landscape provider is participating in *Best Management Practices* as we deliver your services. We maintain social distancing and work outdoors, not entering the customer's home or business. Our shops are not open to the public. We work with our teams routinely to emphasize proper hygiene practices while on the job and to limit their personal contact with the client. We encourage our customers to call us with any questions or concerns.

We are also pleased to provide ongoing continuing education for our team members. Through statewide education programs and collaboration with the Midwest Regional Turfgrass Foundation at Purdue University, we all can learn more about the latest and best ways to care for your property.

Members of The Indiana Professional Lawn & Landscape Association and The Indiana Irrigation Contractors Council also provide jobs for Hoosiers. As an industry, we are all working to get through this incredible event together, and we deeply appreciate your support.
